Twitter poster grading rubric

You should include figures and text in your poster. Your poster should be organized into appropriate sections. Your figures must be labeled and captioned. While you will present your group poster, the poster should be sufficiently detailed that the main ideas are apparent without additional verbal explanation. However, you should aim to keep the text to a minimum. For instance, instead of using sentences to explain how you analyzed the data, you might use a diagram. When you do need to use text to explain something, see if you can use short phrases to convey the information rather than writing out whole sentences. Use your judgment and discuss how best to present the information with your group.

Below is the grading rubric we will be using to assess your submissions. To receive the equivalent of an "A" on this assignment your group will need to have roughly two check marks and two check pluses.
